EXPERIENCE

AWS Cloud Trainee *Jan 2026 – Present*

Cloud Infrastructure & Automation Track

- Provisioned secure 3-tier VPC architecture across 2 Availability Zones with subnets, NAT Gateways, and 15+ granular IAM roles, enforcing 100% least-privilege compliance.
- Engineered event-driven serverless pipelines using AWS Lambda and S3, automating data processing and cutting compute idle time by 35%.
- Deployed 10+ custom CloudWatch metric filters and alarm thresholds, reducing simulated system incident detection time from 15 minutes to under 2 minutes.
- Streamlined cloud provisioning workflows by writing reusable Bash automation scripts and Terraform templates, reducing manual setup overhead by 45%.

PROJECTS

Auto-Scaling Infrastructure & Traffic Routing System *GCP, Bash, Terraform* *2025*

- Designed high-availability GCP infrastructure utilizing Managed Instance Groups (MIG) with dynamic scaling policies, maintaining 99.9% uptime under load.
- Configured global HTTP(S) Load Balancing with health checks across 3 zones, distributing incoming request traffic and reducing latency by 25%.
- Secured backend architecture by configuring Cloud NAT and private VPC routing, shielding 100% of internal instances from public internet exposure.
- Automated startup configurations and instance bootstrapping via Bash scripts, slashing VM deployment and spin-up time by 40%.

Smart Automated Irrigation System *Embedded C++, Arduino, IoT* *2024*

- Built an IoT monitoring node using Arduino and soil moisture sensors, continuously collecting analog telemetry data at 10-second intervals.
- Authored embedded C++ control firmware utilizing threshold hysteresis logic to automatically regulate relay switching for water pump actuation.
- Conserved over 30% water consumption compared to traditional schedule-based timers across 50+ test simulation cycles.

TECHNICAL SKILLS

Languages: C, C++, Python, Java, SQL, JavaScript, Bash
Cloud Platforms: Amazon Web Services (AWS: EC2, S3, IAM, VPC, Lambda, CloudWatch), Google Cloud Platform (GCP: Compute Engine, MIG, Cloud NAT, Cloud Run)
DevOps & Tools: Terraform, Linux/Unix, Git, GitHub Actions, CI/CD, RESTful APIs, Postman
Databases & Frameworks: MySQL, MongoDB, Node.js, Express, Flask, React
Core CS Competencies: Data Structures & Algorithms, Computer Networks, Operating Systems, DBMS, System Architecture

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering **CGPA: 8.58/10**
Nagarjuna College of Engineering and Technology (NCET), Bengaluru *Expected 2027*

Pre-University Course (Class XII) **91.83%**
St. Joseph PU College, Vijayapura *2023*

ACHIEVEMENTS AND CERTIFICATIONS

- **AWS Certifications:** AWS Certified Solutions Architect – Associate; AWS Certified AI Practitioner.
- **Google Cloud:** Google Cloud Fundamentals – Core Infrastructure.
- **Competitive Programming:** Solved 100+ Data Structures and Algorithms problems across LeetCode and CodeChef.
- **Hackathons & Exhibitions:** Competed in HyperAPI Global Hackathon; presented Smart Irrigation System at SCI-NOVA 2024 Project Exhibition.

LANGUAGES

Kannada (Native) | English (Professional Working Proficiency)
